Patented Luxating WingAngle Left / Right Color Coated

Left / Right

SALE: \$799.00

REG: ~~\$1,679.40~~

LUXATING WING ANGLE LEFT RIGHT STAINLESS STEEL COLOR COATED

Luxating WingAngle is a veterinary dental surgery instrument that makes tooth extraction feasible, reliable, and less time-consuming. It boasts a less concave blade to reach the periodontal ligament (PDL) root surface for enhancing it feasibly. We carry Silver, Rose Gold, Gun Metal, Gold, Blue and variable sizes. It is available in a set of 12 comprising 6 right angles and 6 left angles designed to meet the unique needs of surgeons.

Spay/Neuter Surgery Packs Preassembled with Permanent Colored Rings for Easy Identification

RING RAINBOW COATED

G2022-03 RRT

RING BLACK COATED

G2022-03 RBK

SPAY/NEUTER PACK
RING COATED

Spay Packs Ring Coated is an advanced alternative to the least effective masking tape. Five different colors, i.e., Rainbow, Purple, Rose Gold, Black and Blue, make the identification easy for the surgeons. The bacteria remain intact with the instrument if it is taped. Therefore, this instrument can be sterilized to become highly efficient for reuse. This instrument requires low maintenance due to high tensile strength, and the coating will not peel off.

RING ROSE GOLD COATED

G2022-03 RRG

SALE: \$449.95

Thumb Tissue Forceps Fenestrated Handle and Adson Brown Forceps TC

THUMB TISSUE FORCEPS FENESTRATED HANDLE

The Thumb Tissue Forceps Fenestrate Handle is used for atraumatic delicate tissue handling surgery. These forceps provide the most feasible grip to prevent hand strain. The exclusive design makes them lightweight and non-slippery. Available in several variations with 1x2 or serrated teeth on each side of jaws are ideal to be added to your surgical kit. The smallest variation features the Debaquey tip.

TPLO Plates

TPLO PLATES

The Tibial Plateau Leveling Osteotomy TPLO is used in surgical procedures for repairing the cruciate ligament present in the canine. This surgical practice involves a variety of instruments, including screws, saw blades, hub assembly, and TPLO plates. The plates consist of threaded holes to fit the screws. In this way, the plate can be placed perfectly in the knee joint. In addition, the plate becomes a support for the dogs and eliminates them from staggering. Plates are crafted with German stainless to become resilient.
