WINGED LUXATING(WINGLUX) ELEVATOR

Luxating Elevator Winged has a sharp winged blade that is ideal in luxating tooth during extraction procedures. The main job of this elevator is to sever the PDL in order to ease up the tooth extraction process. These thin and slim instruments with winged working ends are ideal to be used in narrow and confined oral surgical spaces. These surgical German stainless instruments can be sterilized and used for long-term.

- Luxating Winged Elevator Color Coated
- WingLux Luxating Winged Elevator Titanium - Color Coated
- Luxating WingAngle Left Right Stainless Steel Color Coated
- WingLux Luxating Winged Elevator Removable Titanium Tip - Color Coated

VETERINARY SURGICAL SCISSORS

Veterinary Surgical Scissors are used for cutting, removal of sutures and dissection of tissues in veterinary surgeries. These scissors are used to cut tissues at body surface or inside the body. The blades are sharp and allow for smooth tissue dissection without hurting the encompassing structure. These scissors are available in many variations and lengths each of them designed for a specific veterinary use and procedure.

- Metzenbaum Scissors
- Mayo Dissecting Scissors
- Super Sharp Scissors
- Tungsten Carbide
- Operating Scissors
- SuperCut Scissors
- Lister Bandage Scissors

VETERINARY NEEDLE HOLDERS

Veterinary Needle Holders are used to hold suture needles while suturing the tissues. The jaws of the holder grasp the needle as they undergo metal-to-metal contact. They are a basic and important part of any surgery or medical procedure.

- Mayo Hegar Needle Holder
- Mathieu Needle Holder
- Castroviejo Needle Holder
- Debaque Needle Holder
- Derf Needle Holder
- Halsey Needle Holder
- Heaney Needle Holder
- Tungsten Carbide Needle Holder

CANINE & FELINE SPAY/NEUTER PACK

Dogs belong to the canine family, and cats belong to the feline family. They are the most common animals undergoing spay and neutering surgical procedures. While performing spay and neuter surgeries, surgeons need plenty of surgical instruments. To prevent the hassle of gathering the surgical instruments, we have come up with a handy solution: Canine & Feline Spay/Neuter pack.

- Feline Spay/Neuter Packs Color Coated
- Spay/Neuter Packs Color Coated
- Spay/Neuter Packs Ring Coated
- Spay/Neuter Surgery Packs

ORTHOPEDIC INSTRUMENTS

Several surgical instruments of different variations help veterinarians during orthopedic surgeries. GerVetUSA is offering the most versatile and supreme-quality Orthopedic Surgical Instruments to ease veterinarians and orthopedists. We understand that the correct instrument must be used according to the requirements of the injury.

- Arthroplasty Instruments
- Bone Cutting Forceps
- Bone Files
- Bone Chisels
- Double Action Rongeurs
- Gelpi Retractors
- Bone Holding Forceps
- Hohmann Retractors

DENTAL KITS & PACKS

Small animals, commonly pets, may need a tooth extraction, root planing, and scaling at any age. So, veterinary professionals must carry out these procedures effectively, which is only possible with innovative and advanced dental kits and packs. To assist veterinary dentists, we have devised several kits and packs with a different number of instruments. Each kit is ergonomically designed and can be reused after sterilization.

- Dental Elevator Sets
- Dental Extraction Kits
- Dental Scaling Kits
- GV Dental Kits
- Periodontal Packs

Tailoring Surgical Instruments to Your Needs

Renowned for our German-forged instruments, GerVetUSA Inc. has become a sought-after name in the surgical instruments market.

Beyond our standard offerings, we extend customization services for medical professionals seeking tailor-made solutions other than conventional surgical instruments. With over three decades of experience, we have successfully manufactured various custom designs, catering to the unique requirements of professionals globally.

Surgical Instruments Custom Manufacturing

The Concept Is New, But Not to You!

If you have a unique idea or seek improvements for Gelpi retractors or any other surgical instrument, GerVetUSA is ready to collaborate. Whether you lack resources, desire unbiased judgment, or require intuitive input for your design, we will assist you with our extensive knowledge, access to materials, and industry experience.

We engage with you from conceptualization through design, approval, manufacturing, and marketing at every stage. We focus on seamlessly creating an efficient surgical instrument tailored to your specifications.

Be Efficient

Maximizing Efficiency with GerVetUSA

Unlock the full potential of your surgical instrument with GerVetUSA's expertise and support.

Our collaborative approach encompasses the following key stages:

- Concept building
- Design
- Approval for the new instrument
- Manufacturing the product
- Product marketing

Your Concept, We Design: Let's Start the Project

GerVetUSA thrives on challenges, providing an efficient manufacturing process for surgical instruments that prioritizes innovation, production-oriented design, and cost-effectiveness.

Initiate the Process—Contact Us

Commence by completing a non-disclosure agreement (NDA) and sharing essential details. We'll tailor an optimal end-to-end solution for your challenges or offer comprehensive support for your unique idea, ensuring the confidentiality of your information and requirements.

Work with Us – The Experts

Partnering with GerVetUSA grants you access to our extensive knowledge and hands-on experience.

We take pride in:

- Challenging conventional theories
- Developing demonstrative prototypes
- Efficient instrument manufacturing
- Collecting constructive feedback

Our collaborative method offers continuous guidance and ensures your active participation throughout the process. The result is a surgical instrument concept tailored to meet your specific needs.

You will leave the process with:

- Concept drawings
- Prototypes
- Official product post-production
- Marketing assistance
